GitLab
Hiring Department

GitLab,

I am currently looking for Summer 2019 Internships. I've heard some fantastic things about working for GitLab online, and recently at CUSEC where a past employee spoke quite fondly of working with the company. I decided to stop by your site to see if you took interns, and couldn't see any open positions.

That didn't stop me from floating this application your way, though. I did a fair bit of WFH during my 3 4-month dev internships with MNP LLP, and feel I would adjust well to remote work.

If you have space on board for an intern, I'd be happy to work with your organization.

Thank you for your time and consideration,

Ryan Fleck
